Checklist for CSC3100 Assignment 1

Before the submission, make sure to test your program according to the "test instructions" published in bb.cuhk.edu.cn. Feel free to revise and re-test your program before the submission deadline.

By the submission deadline, the following files are expected to be placed in your working directory of assignment1.

1. MathExpr.java (required)
2. Other files necessary to execute your program

Note:

1. Since all students are using the same TestMathExpr.java, it is not necessary to be placed there.
2. The file of test cases (i.e., inputA.txt/output.txt) are not necessary to be placed there.

How to check if my files are ready?

In the terminal, execute `ls -l ~/assignment1/` command (all letters are **lower-cased**), the output should include all files required for submission.

If not included, that means not ready.

```
ubuntu@ds01:~$ ls -l ~/assignment1/
